

The game will open up to the home screen where you press the letter of which level you want to start with. Then you will click on the squares until you find the matching words. Correctly matched words will stay on the screen and the goal is to get them all flipped in as few moves as possible. Once all the foods are made or really the ingredients are collected, you've made thanksgiving dinner! You can choose to start over and make it again if you'd like.
